In particular, the Family Businesses team deals with the following matters:

FAMILY BUSINESSES

The Family Businesses Area holds an extensive and solid record advising family-owned undertakings on matters related to their ownership, management, operation and succession.

Along with the shareholders, we study the expediency of drawing up family protocols, marriage

articles, wills and other shareholders' agreements that ensure the smooth continuity of the undertaking whilst providing for procedures to settle potential conflicts of interests. The Practice also maintains close links with major entities and associations of family-owned businesses.
