In particular, the TMT team deals with the following matters:

TMT

At the helm of these areas in constant evolution is a team of expert attorneys with broad experience in legal and technical aspects, so as to meet all the needs and expectations of new clients, while also helping traditional clients to make the leap into the 21st century and to new ways of doing business.

In particular, the Area of Technology and Leisure deals with:

- E-commerce and online services.
- Digital signatures, contracting of related products and services and standardisation policies.
- Electronic billing of related services and products and tax legislation compliance policies.
- Contracting and policies of products and services related to the Internet and websites.
- Procurement of hardware and systems integration.
- ITO/AM outsourcing.
- Software development contracts, licences and support.
- Other contracts related to Information Technology.
- Specific advice in mergers and acquisitions of companies related to Information Technology.
- Management of IT security (ISO 27001) and design of all manner of policies related with the implementation of security techniques and information security management systems.
- Telecommunications, contracting products and services and regulatory compliance.
